

Omid S. Jahromi, Authorizer Technologies Inc., Palm Beach, FL, USA

Multirate Statistical Signal Processing

Multirate Statistical Signal Processing introduces a statistical theory for extracting information from several related signals that have different sampling rates. This new theory generalizes the conventional (deterministic) theory of multirate systems beyond many of its constraints. Furthermore, it allows for the formulation and solution of several new problems such as spectrum estimation, time-delay estimation and sensor fusion in the realm of multirate signal processing. The author presents background material, key principles, potential applications and leading-edge research while striking the appropriate balance between clarity and brevity. The book is self-contained and provides a valuable resource for signal processing researchers, graduate students and practicing engineers.

Contents: 1. Introduction. 2. Background. 3. Multirate Spectrum Estimation. 4. Multirate Time Delay Estimation. 5. Multirate Signal Estimation. 6. Algebraic Theory of Scalable Multirate Systems. 7. Information Theory of Multirate Systems. 8. Distributed Algorithms. 9. Epilogue.

CA, CO, MA, MO, NJ, and NY residents, please add sales tax. Canadian residents, please add 7% GST. Please add \$5.00 for shipping one book and \$1.00 for each additional book. Outside the US and Canada add \$10.00 for first book, \$5.00 for each additional book. All orders are processed upon receipt. If an order cannot be fulfilled within 90 days, payment will be refunded upon request. Prices are payable in US currency or its equivalent. Remember, your 30-day return privilege is always guaranteed.
